About Bingo Paper

Bingo Paper Terminology

1 AUDIT NUMBER

Used to quickly calculate book sales. At the end of each session, subtract the original starting audit number from the audit number on the first remaining book. You will know the exact number of books sold by each sales person.

2 COLOR

The color used on the bingo face which identifies which game is being played. For example, this could be a border (as in border blue), a tint, a pattern or a solid.

3 FACE

The individual bingo sheet containing 24 numbers plus the free space number.

4 FREE SPACE NUMBER

Identifies the unique bingo face and enables you to verify the winning face using a bingo verifier.

5 ON

Refers to the number of bingo faces per sheet. For example, a 3V1 (shown here) has 3 faces per sheet.

6 SERIAL NUMBER

The number printed on the "N" of each bingo face to identify that particular printed set. This number will be the same throughout a set of UniMax® straight goods as well as a set of UniMax collated product, but will vary with each sheet in a non-UniMax collation. Tracking serial numbers increases the integrity & security of a game.

7 SERIES

Identifies the cards in play by the different range of 9,000 cards. Example: 1-9,000; 9,001-18,000; 18,001-27,000... 99,001-99,036.

8 UP

Refers to the number of sheets that are used to make a book. For example, 6 UP indicates the book has 6 sheets of bingo paper.

9 VERIFICATION NUMBER

The unique bingo face number on each bingo face. This face number identifies the 24 face number configuration of the B,I,N,G,O numbers printed. This number is the same as the Free Space Number.

How to select the right UniMax bingo paper series

- Begin by listing out each cut used at your hall, starting with the most popular cut at the top of your list.
- With the most popular cut used, locate the column in the table below that corresponds to that cut.
- Using that column, find the smallest number corresponding to a bingo series. (IMPORTANT: Numbers 1 - 8 correspond to best series selections. For example, 1 = best choice, 2 = 2nd best series selection, etc.)
- Write down the UniMax bingo series selected for that cut and cross out the entire row corresponding to that series.
- Repeat steps 3 and 4 for the remaining cuts, making sure not to duplicate a series that has already been crossed out.

BINGO PAPER

Bonanza Increases Player Spend!

One of the easiest ways to increase your "per player spend" is to add a Bonanza game to your program. This is a great way to increase profits for you, and excitement among players!

Bonanza is played on a covered sheet, such as Surprise Bingo or Casino Tear-Opens.

Before your regular session begins, call 48 numbers and post them on your flashboards. Most bingo blowers have a "Bonanza" or a

"recall" mode and will recall these numbers later in the evening when you are ready to play this game. You can also offer Bonanza Master Sheets to players, so they can mark the 48 numbers and take it back to their table to dab their cards.

Sell sheets for your Bonanza game all evening. Many games sell single cards for 50¢ each. The secret for making money with Bonanza is to allow players to trade in cards that they don't "feel" are winners (after marking the 48 numbers). If they bring you a "bad" card, plus 50¢, give them two cards in return. This keeps them switching and buying more cards all through the game. Be sure to make the prize large enough to motivate players to buy more cards. In a game paying \$3600, Bonanza is generally a \$300 or \$400 game. Some very successful games use Bonanza as their \$500 game.

When it is time to play the game, first ask if anyone already has a coverall. If they do, they win. If not, continue calling numbers until someone wins. It's that easy!

BINGO PAPER

It pays to play pull tabs!

Reasons operators should play more 25¢ and 50¢ tickets:

EVERYONE HAS A CHANCE TO PLAY

Disposable incomes shrink and money is tight. 25¢ and 50¢ games continue to provide a less expensive alternative to dollar games and give everyone a chance to play. A lower cost risk may get new players to try.

EVERYONE LOVES A WINNER

People love to see winners and when games pay, people play. More chances to win = more winners = more players buying more tickets.

SMALL WINNERS MAKE BIGGER PLAYERS

Research shows players who win prizes of less than \$5 will most likely spend their winnings instantly on another chance to win.

FOR THE FUN OF IT!

The more tickets a player can buy for his dollar is more entertainment for the same amount of money: more tabs to pull, more chances to win, more fun!

BANG FOR THE BUCK

The math is simple: a \$20 ticket wager will give a player 20 - \$1 tickets, 40 - 50¢ tickets and 80 - 25¢ tickets. Not only can players play longer for the same amount of money, but they have double, triple or quadruple the chances of winning...and winning BIG!

VARIETY IS THE KEY

When you increase your percentage of pull tab players with a variety of tickets and games, you will have higher sales, which in turn brings in more profits for your location!

What is a Bingo Event Game?

BINGO EVENT TICKET GAMES:

- Are also called ball games, last number or dab games
- Bridge the gap between bingo and Pull Tabs
- Combine the excitement of pull tabs and bingo together
- Play in a very similar manner to seal card games
- Can be played exactly like a seal game in markets where event tickets are not defined

PLAY BLAZING BALLS!

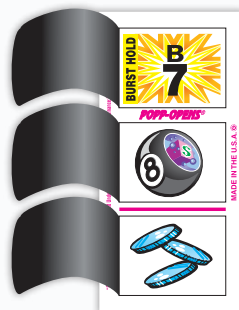

WIN \$2

Series of hold tickets: traditionally bingo numbers B1-O75; held for a larger prize that is paid out after all the tickets are sold

DIFFERENT STYLES OF PLAY OFFER SO MUCH ADDED EXCITEMENT TO THE GAME:

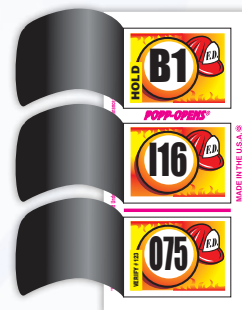

Last number called games:

The winner is the holder of the ticket containing the last number called in the designated bingo game

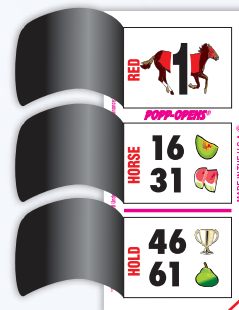

Dab games:

The winner is the player who dabs all the numbers on his ticket as called during the designated bingo game

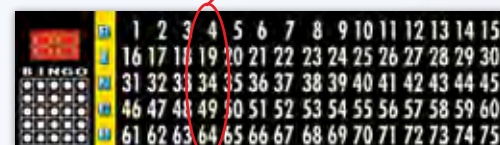

Line or horse race games:

Tickets contain the same number combinations as the downlines on a flashboard, as shown in this example: B1, I16, N31, G46, O61

The event winner is the holder of the ticket with the first downline completed in the designated bingo game

ADVANTAGES TO OPERATORS:

- Smaller ticket counts mean faster ticket sales and game turns
- Event winner is not paid out until the entire deal is sold
- Multiple sign-ups give more players an opportunity to win the large end-of-game prize
- Player excitement builds until the moment when the end-of-game winner is announced

Coinboards add more variety and excitement to your Bingo games!

A **coinboard game** is a style of pull tab game. Like any regular deal of pull tabs it has a predetermined ticket count and a definite payout and profit. A coinboard can come in either an "all instant win" format or a seal card format. It is played just like any other instant or seal card pull tab game with some differences:

- The flare is much larger, thicker and heavier than usual, and may contain real silver and/or gold coins embedded in it.
- Some winning tickets contain color-coded numbers that correspond to the coins, indicating that the player wins them.
- Coin winners also win additional cash prizes, which are all predetermined and clearly indicated under the coin.
- Some coinboards also feature merchandise prizes in addition to cash payouts, as instant wins and/or seal prizes.
- In order to provide the widest variety of play styles and prizes, most coinboards use "generic" color-coded numeral based pulltabs, and therefore they do not have the Cash Payout® or Win Guard® features. Players and operators refer to the flare itself to determine the specific value of each winning ticket.

How to Play a Coinboard

Losing Ticket (all numbers are black)

As easy as 1-2-3

- 1 Players buy the tickets and open them
- 2 Tickets with all black numbers lose. Tickets with a colored number or star are winners!
- 3 Match the colored number or star to the numbers on the coinboard to determine the prize won!
